

Outdoor Habitats for your Furry Friends

Product Catalog

We've been designing, selling and installing, happy and worry-free outdoor enclosures for over 18 years.

Recommended by veterinarians throughout the World, as the best way to keep pets safe.

For Cats

For Small Dogs

Our Story

Catbitats is a family owned and operated business, run by Dwayne and Kelly Carter. Dwayne (and friends) do the local (and sometimes remote) installations. While Kelly has been a cat lover and owner since a young age, I (Dwayne) was strictly a "Dog Guy"...until....Domino and Spike (and their 2 other brothers and sisters, Puff and Oreo) came into our lives.

Since they are such an important part of our family; it makes us sad to leave them inside so much (while we are outside, playing). Living in Arizona, we spend many hours enjoying the yard, but we're always saddened by the four little faces, pressed against the patio glass.

Then we had a thought....Cat Patio! We thought the eight foot cinder block wall surrounding our backyard would be fine.....but Spike scaled it within seconds. Then came the harness and leash idea....which meant instead of enjoying the great outdoors, Kelly and I spent all our time, unwrapping and untangling four angry cats. No more Cat Patio.....

That's when we thought about...Catbitats. After researching dozens of companies around the world...and talking to many fellow cat owners and veterinarians...Catbitats was formed. Kelly and I have discovered countless cat owners, all with the same problem. How do I let my indoor cat enjoy the benefits of being outside....safely?? A Catbitat is the solution!

Our modular enclosures are designed to mix and match to suit your needs. The configurations are limited only by your imagination. The system is designed to expand so it can fit any space, budget, and even expand over time.

Catbitats is a labour of love. We've been providing safety and happiness to pets & their companions since 2008.

We design, sell and install them to protect our fur babies, and trust it to protect yours.

Spike didn't like his vest one bit!
Domino jumped the 8 foot wall,
moments later...nope...this won't work!

Our Enclosure Designs

Our Catbitat enclosures have been perfected over 18 years. Our manufacturer has put a lot of thought and engineering into their design. It is a completely closed, modular system designed to keep pets safe from harm and prevent escape. The materials have been carefully chosen for their strength, durability as well as aesthetics.

Our unique modular, frame-less construction allows the structure and tunnels to be self-supporting as well as visually pleasing so that it practically “disappears into the background.” They are built from strong, durable 2” x 2”, 10-gauge, galvanized steel mesh and milled cedar. Cedar’s natural qualities act as an insect repellent, (fleas, mites, etc.) and the strong welded steel mesh can keep out any threat. All these features make our enclosures a completely safe environment for your pet. And because they are modular, you can easily add to them and modify them over time.

To make it feel more like home, we offer a selection of accessories such as, pet doors, heavy-duty awnings and hammocks in bright, fade-resistant, water-repellent material, meant to withstand sun, rain or snow.

Over the years we have added many features to make using the enclosure as enjoyable for humans as it is for pets. As cat owners, they have designed the human doors with sly cats in mind. Our regular doors are 24”W x 60”H. They are 4” from the bottom of the door panel. The small size forces you to be aware of your surroundings as you open the door so you will notice a cat trying to sneak out. For enclosures that are under 60” tall we have a small human door measuring 24”W x 36”H, that is 4” from the bottom.

Also available are non-trip doors, which are used when the door is placed in front of downward stairs or for people that have mobility issues. In addition, we have made a non-trip 32”W door, so that you can cut the grass inside large enclosures. Our standard doors open Left to Right, but a Right to Left door can be specified. All doors come with our unique latch mechanism, with padlock ability on the outside of the enclosure. On request, another latch can be installed on the inside.

Our modular designs are flexible and portable, so that when you move, you can disassemble and transport the enclosure to a new location.

Catbitat enclosures can be assembled in infinite combinations. Find the one that is best for you or contact us to help you choose.

The Courtyard

The Courtyard is our most spacious and interesting pre-configured catio design. It was created to maximize the vantage points, activities, and space for your cat(s) to explore. The Courtyard catio features a center courtyard area for this cat castle where you might plant a garden or set up a table and chairs to watch your cat(s) explore and play! There is something for every cat in the Courtyard. With multiple enclosure areas connected by tunnels and stairs, both high and low, there is room for many cats in the Courtyard!

Keep in mind the tunnels, stairs, and enclosures can be repositioned as you see fit during assembly so that you can arrange them in a way that works best for your site.

Please note that additional accessories such as awnings, hammocks, ramps, and scratching posts are not included with the catio kit but can certainly be purchased separately!

Designing Your Enclosure

If our predefined kits don't suit your needs or you simply have a fabulous design you want to execute, you can design your own Catbitat outdoor pet enclosure. By mixing and matching from our comprehensive selection of modules you can create the perfect habitat for your pet.

We have designed our enclosure system with flexibility and ease of assembly in mind. All custom outdoor cat enclosure kits will come with the appropriate hardware, instructions and pliers. We even pack it with our end-users in mind.

All pieces connect to each other with ease. Before connecting the tunnels, stairs, towers or bridges to the enclosures, you will need to cut out an access hole so that they can be attached. The only tools that are required are a hack saw and file. You can also use bolt cutters if you have them handy. Follow the template that is provided so that you have the correct size hole. You can have a handyman put it together for you, but we designed it so that anyone can assemble it.

Make a list of all the pieces you will need and place your order by phone, or e-mail.

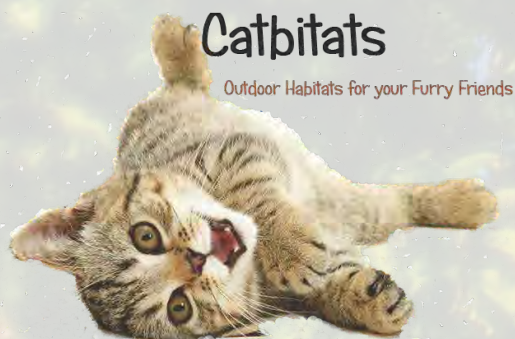

Custom Designs

If trying to figure out what you will need is a bit too overwhelming, you may want to contact us to help you plan and design your custom enclosure.

Custom orders are the best way to tailor the enclosure to your needs. Send us an e-mail with a photo of the area you would like the enclosure to fit and we would be more than happy to give some suggestions. If you have questions, please contact us directly and one of our professionals would be happy to discuss you and your cat's requirements and budget for an outdoor cat enclosure.

Custom Order Quotes

For your convenience you can place a request for a quote by submitting your enclosure requirements and a picture of the designated area, either by email, or regular mail. Please include measurements of the area and a brief description of the enclosure that you would like. If you would like the enclosure to match the colour of your house, you will have to mail us a paint chip so that we can make sure it matches. Once we have received your information, you will be contacted by phone to discuss the enclosure. We will email you a written quote.

Enclosures

If you can dream it...we can build it!

“ My husband ordered the cat cages from you a few weeks ago and we wanted to thank you for such an excellent product. The cats were a little hesitant the first day because they wanted to scope it out while we weren't looking, but now they can't wait to fly out the window into their new cage. They absolutely love it! They enjoy the long tunnel and just sit in it and stare out. We looked at a lot of cages before we decided on the Cat's Den which was the most interesting and exciting for two inquisitive Siamese cats... Thanks again. —Portland OR

“

I just wanted to tell you my cats are enjoying their enclosure! They spend a lot of time outside watching and listening! They enjoy the daytime as well as at night. They tend to use the lower part of the enclosure much more than the upper part. It is great they can spend some time outdoors while being safe and not hurting other animals.

Neighbourhood cats come to visit them as well!

Custom cat and dog enclosure

“

“We got our Catbitat set up and Bruno has been using it ever since, it seems to work quite well!... it is an

excellent solution for small dogs that are left alone some of the time. Everyone thinks he is quite spoiled and we agree!” — Ken, Calgary, Alberta

“I just can’t thank you enough for being in business! Your product is safe, sturdy and secure. And your prices are so reasonable. I just can’t recommend you enough.”

— Kara & Dean, Rockypoint, N.Y.

Enclosure Components

Use Tunnel Ends and Small Access Doors to complete your design. Contact us and we can help you determine what kind of extra support your design may need.

Small Access Door

These small doors allow you to retrieve your pet when they're in hard to reach places. On request, they can be added to stairs, tunnels, towers and bridges.

ADD1 \$14

Tunnel Support

These powder coated brackets provide additional support for tunnels when attached to vertical surfaces such as chain-link fences.

TS10 \$51

Shelf Bracket with Hardware

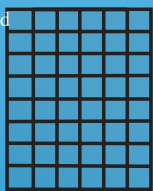

If you require additional shelf brackets or you would like to provide your own shelf materials (wood, plastic, etc.) then you are able to get our specially designed shelf brackets individually. Hardware for fastening to the mesh walls of the enclosure and screws to hold wood securely in place included. The brackets are loose with hardware and DO NOT COME WITH the actual shelves. You will need to provide your own wood or composite material for shelving. Shelves from 22" to 48" in length require 2 brackets (one on each end)

Shelves from 60" to 96" in length require 3 brackets (one on each end and another in the middle for stability)

HHSKBRACK6 \$ 13.70ea

Tunnel End

Tunnel Ends cap off a tunnel section.

Black TE20 \$14

Clip Remover & Extra Clips

The Clip Remover Tool assists in the removal of the enclosure clips. It is necessary to dismantle the enclosure for transportation.

Sold only to existing clients.

Assorted Hardware

Additional hardware, such as clips and pliers can be ordered separately from the kits on request.

Sold only to existing clients.

Order by phone (480)221-9013 or at Catbitats.com

Cedar Wood Shelving

Standard planks are milled 1" Thick by 8" Wide and are available 12" Wide

Cedar boards stand up well to all kinds of outdoor weather. They do not rot and provide sturdy support for your pet. The planks include all the appropriate hardware, although the wider boards may need extra support. When ordering floor boards, please note the quantity and add the code FL after the product code. 8" wood is nominal 1x8 = Actual size is 7.25" x 0.875". 12" wood is nominal 1x12 = Actual size is 11.25" x 0.875".

Cedar Planks \$ 30.00 - \$ 140.00ea

Cedar has the advantage of being a natural flea and pest deterrent as well being a visually attractive. Please note that "milled lumber" measurements are slightly different than stated.

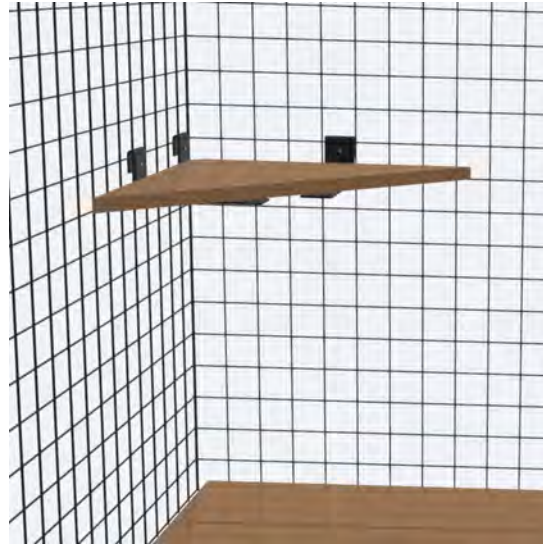

Cedar Shelving Options

Catio Corner Shelf

The catio corner shelf is a great choice to help your cat get the most out of their custom or pre-configured cat enclosure! Our large shelf has enough room for your cat to comfortably lounge on, or it can be used as an intermediary step to change elevation between other shelves, towers, tunnels, and more - the options are vast and shelves can be easily moved around to give your cat a new look anytime!

Finished cedar boards are great for the outdoors! They do not rot and are a flea deterrent. The standard planks are milled 1" thick by 12" wide. Dimensional milled wood is slightly smaller than the measurements given.

- Wood is priced and provided with all the appropriate hardware for shelving.
- Brackets, hardware, and screws included.
- 24" Shelves get three (3) brackets (each placed to support a corner
- 15" Shelves " get two (2) brackets (each facing the same direction with one set in the middle of the shelf and the other supporting the outside corner closest to the wire mesh).
- 12" wood is nominal 1x12 = Actual size is 11.25" x 0.875.

15" Catio Corner Shelf \$ 30.00

24" Catio Corner Shelf \$ 50.00

Staircase: Cedar Three Step Kit For Catio

The Staircase is a great choice to help your cat get the most out of their custom or pre-configured cat enclosure! Our Staircases allow your cat to tactically travel up and down inside their enclosure! Cats can transition elevations quickly to a shelf or tunnel entrance to allow for more interesting exploration and mobility. Finished western red cedar boards are great for the outdoors! Cedar is naturally rot resistant and is a flea deterrent. The standard planks are milled 1" thick by 8" wide. Dimensional milled wood is slightly smaller than the measurements given. The surface area is sanded for a smooth look and feel.

Constructed with weather-resistant and bug-repelling 1x8 western red cedar Options for 2', 4', and 6-foot lengths

Cedar steps are 6.75" long

Steps are fastened securely with black powder-coated steel shelving brackets

The Staircase Cedar Three Step Kit comes with five connected milled cedar boards and three shelving brackets with wood screws to create three steps.

The stair's dimensions are precisely spaced in order to fit well with our 2" by 2" mesh. \$ 81.00 ea

Order by phone (480)221-9013 or at Catbitats.com

About Ordering

Order Policies:

- 1) There is no maintenance required because of the use of cedar wood and galvanized powder-coated mesh. Environmental conditions will shorten the life span of the enclosures. It is recommended that you grease the pins of the door hinges once a year.
- 2) It is suggested that at least two people install the enclosures.
- 3) It is not recommended that cats 3 months, toy dogs 4 months or younger be allowed in the enclosure made from the 2"x 2" mesh. It is possible that the kittens or puppies will slip out or their heads will get stuck. For other dog breeds it is up to your own judgment as to the age of the dog allowed in the enclosure.
- 4) We will accept any standard pre-packaged kits for a refund of the purchase price of the product within 30 days of the delivery date to the customer. There will be a \$150.00 administration and restocking charge. The cost of shipping the returned item will be the customer's responsibility. In all other circumstances all sales are final. Full Terms and Conditions are located here: (<https://catbitats.com/shipping-info/>)
- 5) Shipping and handling charges are not refundable under any circumstances. If the product is damaged during delivery to the customer we will send replacement parts. A damaged part in no way extends our return policy to cover refunding shipping and handling costs or the cost of shipping products back for refund or exchange.
- 6) Damaged accessory items must be returned before we will send a replacement item. Proof must be provided of damaged cage parts before they will be replaced. This may include a digital photo, analog photo, video or return of the damaged item. This proof will be requested at Habitat Haven's discretion.
- 7) We cannot accept returns and will not issue credits for products damaged due to the customer's improper packaging, including damage incurred while shipping the product back to us. It is the customer's responsibility to properly package and insure returned packages as well as handle any claim issues regarding damage during return.
- 8) We are not responsible for damage done during assembly/disassembly.
- 9) We cannot accept returns for used or opened accessory items, unless it is due to a defect with the product. This includes and is not limited to damage done to any Hangtime products.
- 10) We cannot refund items that have any type of animal contamination such as, but not limited to feces or urine. If we receive returned items with contamination on them, they will be returned to the customer at the customer's expense and cleaned of any contamination and returned to Habitat Haven or the value of the contaminated parts will be deducted from the total dollar amount of the refund.
- 11) Once returns are received, they will be inspected for damage. Acceptance of a return from an outside carrier does not mean we agree the products are in acceptable condition for a refund. Once the packages are opened and inspected, any part in damaged or unacceptable condition will be deducted from the return amount. Cages and accessory items are not necessarily inspected immediately upon receipt. Unacceptable or missing items will be deducted from the refund amount at the full retail price. It is solely at our discretion to determine if the parts are in acceptable condition or missing.
- 12) Full payment is due once order is placed and before the product is shipped. If any extended payment terms are granted or a charge back is filed with the credit card processor, there will be a 15% per month service charge for any balance beyond the agreed upon payment date until the payment is received in full.
